

DIRECT FED MICROBIAL

Benefits of Ganpro

- Establishes and maintains a healthy digestive tract
- Promotes nutrient absorption and improved feed efficiency
- Improves feed intake and weight gain
- Reduces pathogenic load in gut
- Optimizes the health and performance of your herd

■ Control ■ Ganpro

Ganpro contains a source of live (viable), naturally occurring microorganisms

Ganpro is easy to use

- No special storage or refrigeration required
- Ideal for milk replacer and starter diets
- Can be pelleted (survives pelleting up to 94%)
- Can be used in poured, pressed and cooked blocks or tubs
- Is liquid feed stable
- Remains viable when added to premixes/supplements and will not react with other ingredients
- Ideal for antibiotic-free operations

Guaranteed Analysis

Calcium: Minimum - 27% / Maximum - 27.5%

Bacillus coagulans: Minimum 55 million CFU*/gram

* Colony forming units

Ingredients

Calcium carbonate, Bacillus coagulans

Recommended For

Dairy and Beef Cattle of all ages

Mixing and Feeding Directions

Mix into feed to provide 1.5 - 2.0 billion CFUs/hd/day. Feed at the rate of 1-1.25 ounces or 28-36 grams/hd/day. Consult animal health professional for specific feeding recommendations.

Packaging

50 lb bag

Accepted for use as a Direct Fed Microbial by U.S. F.D.A. Center for Veterinary Medicine
